INTRODUCTION

Software developer with proven expertise in building technology solutions using JavaScript, ReactJS, TypeScript, NextJS, MaterialUI, TailwindCSS, etc. I understand project lifecycle in-depth and I’m capable at all aspects of development. I design and develop user-friendly, cross-browser compatible interfaces, while delivering value and solving real world problems.

SKILLS

ReactJS, NextJS, TypeScript, Redux & Redux Toolkit, JavaScript, TailwindCSS, MaterialUI, APIs, Figma, Adobe Photoshop, Git & Github, etc.

EMPLOYMENT

Glown, (Abuja, Nigeria) - Frontend Developer (Contract) JAN 2025 - PRESENT

- Contributed to the development of a multi-vendor beauty and cosmetic services application, this application ensures business owners can manage their bookings, services, customers, payments, etc, and clients can manage their appointments..
- Collaborating closely with UI/UX designers and backend developers, I built several components from scratch for the internal design system that facilitate the collaboration between businesses and customers, while optimizing to improve user experience and for scalability.

Koboaccountant Africa, (Lagos, Nigeria) - Frontend Developer (Full Time) FEB 2024 - PRSENT

- I contributed to the development of user friendly interfaces, collaborating closely with the UI/UX designer and backend developer to create intuitive collaboration and productivity tools for accountants.
- I developed new components for the internal design system, and contributed to rebranding the entire company landing page and creating several dashboards that serve to facilitate the collaboration between finance experts and clients.

Granger PR, (Texas, United States) - Frontend Developer (Contract) FEB 2024 - APRIL 2024

- Collaborated with a team of backend developers and QA testers to design and implement a robust e-commerce platform.
- Integrated third party services and APIs to extend platform capabilities, using tools like NextJS server-side, axios, etc..
- Enhanced user experience through effective big fixes and performance optimizations.

TENS, (Lagos, Nigeria) - Frontend Developer (Contract) SEPT 2023 - FEB 2024

- Contributed to the development team in the creation of a logistics application. This application includes inventory management, order tracking, and supply chain optimization.
- As a Frontend developer, my responsibilities included crafting the user interfaces, integrating complex functionalities into the application, and ensuring seamless user experiences across various devices.
- Working in an Agile environment, I actively contributed to the development of key features, such as real-time tracking and interactive visualization components.

PROJECTS

Frontend Projects

MosePay - Virtual Top-Up Platform

VTU platform for purchasing affordable data, airtime, TV and Electricity bill payments, funding betting wallets, etc.
<https://www.mose-pay.com/>

ReceiptSync - Inventory Management System

Platform where vendors can record sales, issue and record receipts. Analyze past and current sales data that helps boost business performance.
